We can furnish a splendid collection of rare, hardy and tender cacti from Arizona and New Mexico in strong collected specimens at very reasonable rates, and a list with prices will be gladly sent upon request and any further information given by letter.

WE HAVE UNEXCELLED OPPORTUNITIES TO HAVE RARE PERENNIALS AND OTHER PLANTS COLLECTED IN THE WESTERN STATES, AND PLACE OUR SERVICES AT THE COMMANDS OF ALL INTERESTED WHO WILL ADDRESS US IN THIS MATTER.

Abies Arizonica Argentea. Silver Cork Fir.

The fame of this beautiful new conifer is now well established and specimens are growing in many parts of this country. It is a truly unique tree, with its intensely silver-blue foliage and the SILVER-WHITE CORK BARK which develops as soon as the trees attain a height of about three to four feet. When planted in rich and not too dry soil it proves a rapid grower, increasing about six to twelve inches in one season.

IT IS ENTIRELY HARDY.

For sizes and prices of trees see page 1 of this list.

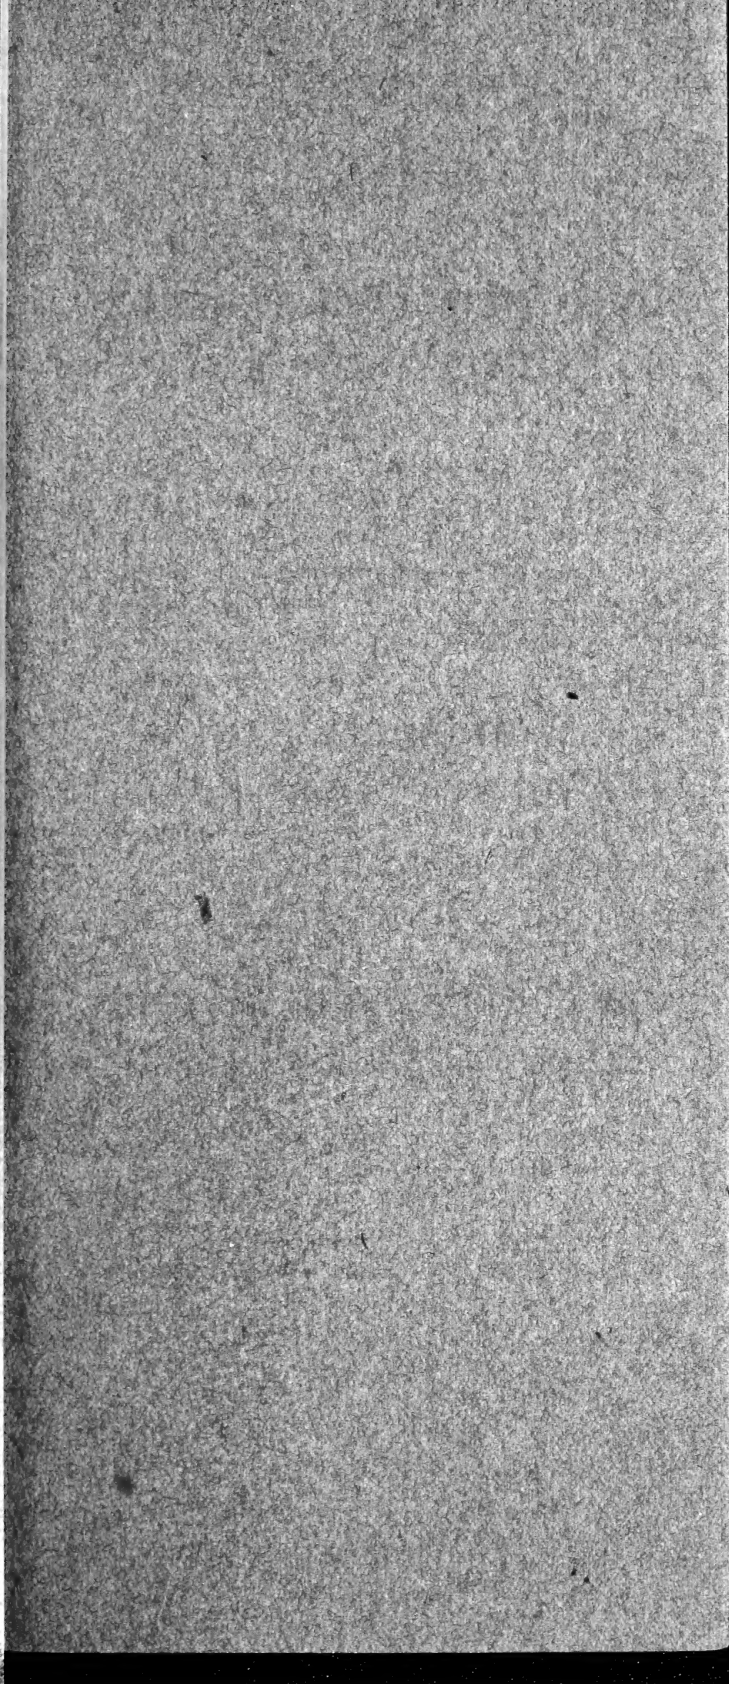

SEED we offer at \$20.00 per pound; \$2.50 per ounce; \$1.00 per trade packet.

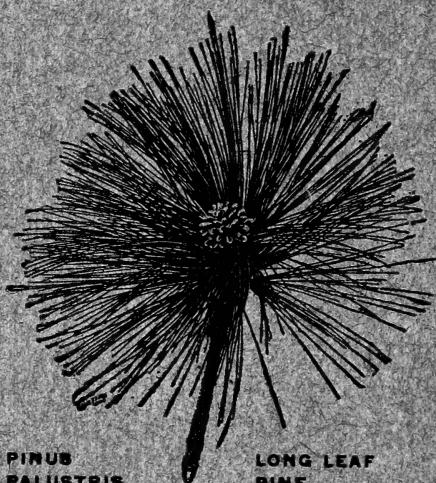

Agave Applanata, var. Parryi. Parry's Hardy Aloe.

Being entirely hardy and of strikingly tropical aspect, it will find useful employment in many plantings. It has grayish-green, very thick, fleshy leaves, about eighteen to twenty-four inches long, with long, brown, stiff spines at their ends. The flowers are showy, greenish-yellow and two to four inches long.

For sizes and prices see page 15 of this list.

SEED 50 cents per trade packet.
